

ABDELRAHMAN ESMAT BADAWY KHALIFA

Aspiring Computer Science / Artificial Intelligence Student

Sheikh Zayed, Giza, Egypt | abdelrahman.esmat.badawy@gmail.com | linkedin.com/in/abdelrahman-esmat-332045426 | github.com/abdelrahmanesmatbadawy

PROFESSIONAL PROFILE

Ambitious and technology-driven Egyptian student with a strong passion for Computer Science, Artificial Intelligence, Embedded Systems, and Software Development. Completed advanced technology training through the Digital Egypt Cubs Initiative and developed practical projects spanning Python programming, MicroPython, embedded systems, web development, and mobile application development. Recognized for academic excellence and active participation in technical presentations and school activities. Seeking to pursue a Bachelor's degree in Computer Science or Artificial Intelligence while contributing to innovative research and continuously expanding technical expertise.

EDUCATION

Egyptian General Secondary Certificate (Scientific Mathematics)

Graduated 2026

Al Radwa Language Schools — 6th of October City, Egypt

- Overall Score: 229.5 / 320 (71.72%)

Previous Education

- Dar El Kowther Private School — Assiut (Grades 1–5)
- Manial El Rowda Language Schools — Cairo (Grade 6 & Preparatory Year 1)
- Al Radwa Language Schools — 6th of October (Preparatory Year 2)
- Orman Language Schools — 6th of October (Preparatory Year 3)

TECHNICAL SKILLS

Programming: Python • C++ (Fundamentals)

Artificial Intelligence: AI Fundamentals

Embedded Systems: Raspberry Pi Pico • MicroPython • Analog Sensors • Seven-Segment Displays • Wokwi Circuit Simulation

Web Development: HTML

Mobile Development: Thunkable

Computer Skills: Microsoft Office • Technical Research • Technical Presentations

SELECTED TECHNICAL PROJECTS

Interactive Adventure Game (Python)

Designed and developed a text-based adventure game using Python, implementing:

- Functions, Loops, and Conditional Statements
- Exception Handling and Randomization
- Interactive User Experience Design

Embedded Systems Monitoring Project

Designed and programmed an embedded system using Raspberry Pi Pico and MicroPython. Main features:

- Temperature, light, and potentiometer sensing
- Analog data processing
- Four-digit seven-segment display output
- Circuit simulation using Wokwi

Mobile Application Development

Developed a mobile application using Thunkable as part of the Digital Egypt Cubs program.

Educational Web Project

Designed and developed an HTML webpage describing knowledge and technical skills gained through the DECI learning program.

Data Representation Presentation

Prepared an educational presentation explaining Binary & Digital Data, the Hexadecimal System, Raster & Vector Graphics, Digital Audio, and Image Representation.

Dream Gaming Computer Research

Conducted technical research comparing modern computer hardware components including CPU, GPU, RAM, Storage, Motherboards, and Computer Cases.

TRAINING & CERTIFICATIONS

- Digital Egypt Cubs Initiative — Level 1
- Digital Egypt Cubs Initiative — Level 2
- Digital Egypt Cubs Initiative — Level 3 (Embedded Systems & Robotics)
- Oxford English Placement Test — Overall B2
- Certificate of Appreciation — Chemistry
- Certificate of Appreciation — Physics

ACADEMIC ACHIEVEMENTS

- Fourth Place — Honor Board, Orman Language Schools (Preparatory Year 3)
- Certificates of Academic Excellence in Chemistry and Physics
- Consistent participation in technical learning programs

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Technical presentations and team-based educational projects
- Active participation in school activities
- Strong interest in robotics and artificial intelligence learning
- Regular programming practice and collaborative project development

CORE COMPETENCIES

Problem Solving • Critical Thinking • Teamwork • Fast Learning • Communication Skills • Research Skills • Analytical Thinking • Time Management • Presentation Skills • Self-Learning

LANGUAGES

Arabic: Native

English: Upper Intermediate (B2)

INTERESTS

Artificial Intelligence • Machine Learning • Software Engineering • Robotics • Embedded Systems • Computer Hardware • Mobile Applications • Emerging Technologies
